

TRIDEKON™

GRAIN BOSS

Maximize efficiency with two models
GrainBoss 13
GrainBoss 16

Presenting Tridekon Grain Bag Extractors

Offering the features you need:

DIRECT DRIVE WHEELS

- Hydraulically driven patent-pending direct gear drive works in combination with bag roller to pull the GrainBoss through the bag.
- GrainBoss will work through mud or tears in the bag.

360° ROTATING AUGER

- Patented unloading auger eliminates the need to move your truck to even out loads.
- Hydraulically powered drive gives operator precise control.

PULL THROUGH ROLLERS

- Patented narrow pull through roller design keeps GrainBoss inside track of bag.
- Rollers drop bag eliminating need to stop production to empty bag rollers.

FEED AUGER SYSTEM

- Primary auger breaks up bagged commodity.
- Patented enclosed cross auger system feeds auger to maximum capacity.

NARROW ROLLER DESIGN

- Narrow bag pull system keeps GrainBoss inside track of the bag.
- Eliminates need for extensive snow removal.

STEERABLE WHEELS

- Patent-pending steerable axles allow user to align machine to the bag.
- Eliminates the need to unhook the bag to realign extractor with the bag.

Tridekon GrainBoss extractors come standard with the features you need

GrainBoss 13

GrainBoss 16

200 bu./min capacity

360° rotating auger

300 bu./min capacity

driven steerable wheels

Direct Drive System Pulls GrainBoss and Tractor Through The Bag

with the tractor in neutral and emergency brake off let the bag rollers and wheel drive pull the tractor and GrainBoss through the bag as it transfers the grain into the truck.

For safety reasons an operator should be present in the tractor at all times when operating the GrainBoss.

Pictured above is a GrainBoss working in a grain bag banked with snow. The narrow roller design eliminated need for extensive snow removal.

See just how fast the GrainBoss 16 can load a truck
